Parley - word types

Category: Application

Question: When I enter a verb in Parley and choose as word type "regular" or "irregular" in the activated word type column it shows the expected entry but in the activated Conjugation window I can't enter the conjugation. If I want to enter them I have to choose "verb" in the word type. What is the use of the other word types "regular" and "irregular" Any input arerciated Parley Version 0.9.2-svn Using KDE 4.3.2 (KDE 4.3.2) Karmic on Gnome
